

### REMARKS

The claim language has been revised slightly in order to clarify the aforementioned terminology relating to the technical field of the invention already previously presented in the specification for this continuing application and in its preceding parent applications. The inclusion of the words "automatically" or "dynamically" was intended to help better describe the more technical terms previously presented which included technical terms like real-time, interactive, and simultaneous database synchronization which were not completely understood and therefore not communicated clearly by my prior counsel. The arguments previously presented in the amendment previously submitted demonstrate the value of these terms and distinguish these claims from the prior art.

Every effort has been made to correct the claims as detailed by the Examiner. It is respectfully believed that the application is now in condition for allowance, and action to that end is respectfully and earnestly submitted.

Respectfully submitted,

Date: 7/15/07

  
Rachael Linette Cook, Inventor
